REQUEST FOR EXPRESSION OF INTEREST (REOI):

CONSULTANCY FOR THE IMPLEMENTATION OF A VECTOR BORNE DISEASE FOCUSED PUBLIC EDUCATION CAMPAIGN IN ONE CARPHA MEMBER STATE

CONSULTANCY

The Caribbean Public Health Agency (CARPHA), with funding from the 11th EDF Programme for the Support for Health System Strengthening for prevention and control of outbreaks of Zika and other mosquito-borne diseases in the Caribbean, is seeking to engage a consultant for the implementation of a vector borne disease focused public education campaign in one CARPHA member state.

BACKGROUND

Vector-borne diseases (VBDs) such as those caused by viruses and parasites which are transmitted to humans, mainly by mosquitoes, are a major threat to the health and economies of societies globally. Over 80% of the world's population is at risk of contracting a VBD with mosquito borne diseases (MBDs) having the greatest impact¹. MBDs such as Malaria, Dengue, Chikungunya and Zika are diseases that account for approximately 17% of the estimated global burden of infectious diseases, with approximately 700, 000 attributable deaths each year.

The epidemics of Chikungunya (2014) and Zika (2016), current outbreaks of Dengue and other mosquito-borne disease threats show the need to have robust regional health security systems, especially since many CMS depend on tourism as a major source of revenue. There is therefore a need to strengthen the public health workforce and surveillance systems and most importantly educate and empower communities in the region to detect and respond to these public health threats.

Objective of the Project:

The overall objective of the project of which this contract will be a part is as follows:

To contribute to the improvement of public health of the Caribbean population through a reduction in morbidity associated with Zika and other mosquito-borne diseases.
